introducing the Very Cat Fund (VCF)

the Very Cat Fund (VCF) is a modern hedge fund inspired by the world of memes.

the concept is straightforward:

a portion of the initial fairsale (20%) is allocated to holding the most attractive cat-themed memecoins. some of the projects VCF aims to partner with include but not excluding: \$MEW and \$MANEKI.

criteria for inclusion in the VCF

to be part of this fund, projects must meet certain requirements:

- **original concept:** projects must present a unique and innovative idea.
- **high-quality branding:** professional and appealing branding is essential.
- **well-managed team:** an exceptionally competent and organized team is required.
- **cat-related theme:** projects must be related to cats.
- **stellar community communication:** projects must maintain excellent communication with their community.
- **transparency:** a proven track record of transparency is crucial.

transparency and security

the VCF is committed to transparency and security. all transactions, including buys, PNL (profit and loss), and fund movements, will be available on our official website: vcf.katanaplanet.io.

investment theory

the VCF operates on a "trickle-down" system common in all asset classes. high market cap and relatively low volatility coins tend to rise first. profits from these are then reinvested into lower market cap projects, eventually benefiting the entire market.

this strategy allows the VCF to hedge \$koko's price effectively. during market corrections, the VCF will use its profits to buy back \$koko tokens and provide additional liquidity. this approach helps in faster recovery of \$koko from price corrections and stabilizes the token price at higher levels.

exit strategy and further investment

once the \$koko token (market cap) exceeds its investments from the vcf, the fund will be terminated. any remaining profits and holdings will be redirected towards marketing and enhancing liquidity. this includes improving ecosystem rewards.

secure fund management

given the sensitive nature of such a fund, security is paramount. the vcf will utilize a multi-sig wallet created by squads (squads.so). this ensures that all participants and managers can vote on fund movements and allocations. all transactions will be transparent on the vcf website and the solana blockchain.

why are we doing this?

at koko, we've witnessed countless memecoins rise and fall over the years. the ones that endure are not only backed by vibrant and unique communities but are also driven by skilled development teams that push the boundaries of innovation. we believe that infusing a memecoin with real, practical utility while fostering genuine enthusiasm among its supporters will create lasting impact and sustained "hype".

\$koko's commitment to the Solana ecosystem

\$koko is firmly committed to supporting the Solana ecosystem. by investing in Solana validators, \$koko earns SOL (Solana tokens), which are then used to further benefit the community.

this improves Solana's TPS (transactions per second) & builds a more robust network so more projects like \$koko can thrive.

utilization of earned SOL

the SOL earned through these investments will be strategically reinvested into the community. this includes:

- **marketing efforts:** expanding the reach and awareness of \$koko and its associated projects.
- **community investments:** reinforcing the community by funding initiatives and projects that contribute to the growth and sustainability of the ecosystem.

tokenomics

liquidity: 40%

token liquidity will be provided with 35% going towards DEX listings, and the other 5% going towards CEX listings.

fairsale: 35%

allocated towards the fairsale participants. the entirety of the fairsale tokens will mount to this portion.

airdrops: 5%

twitter, top catcoin holders & various premium NFT collection holders will be receiving in stages airdrops.

ecosystem rewards: 10%

\$koko's upcoming NFT collection & other ecosystem products will receive rewards from this pools of \$koko tokens.

early collaborators: 5%

project artists, animators, content creators, nft artists, and all contributors who help \$koko launch & maintain will receive vested RTUs (restricted token units) for their efforts over the life span of the project.

team: 5%

allocated towards the development team. locked for six months.

fairsale funds allocation

VCF: 20%

the Very Cat Fund will be using this portion of fairsale to invest and divest to hedge price corrections in koko, and to strengthen its liquidity.

liquidity: 40%

35% will be allocated towards DEX listing liquidity and the 5% will go towards CEX liquidity in future listings.

marketing: 20%

twitter, telegram & youtube KOL marketing, and massive marketing campaigns on DEX & CEX platforms.

ecosystem rewards relief: 10%

\$koko's ecosystem of future products will be eligible for \$koko rewards. these rewards need to be backed by liquid SOLs for any potential sell off pressures.

product development: 10%

our future products of \$koko will be developed from these funds (hint: nfts). this includes: research, technical development work & employing the best people in the field.
